

Curriculum

Welcome to Montessori Center SD.

We are a Home based Montessori Preschool that follows the principles of Dr Maria Montessori which encompassed the following areas:

Practical Life

The purpose and aim of Practical Life is to help the child gain control in the coordination of his movement, and help the child to gain independence and adapt to his society thru activities that include many tasks children see as part of their daily routine in the home such as preparing food, spooning, watering plants, and learning how to getting dressed.

Sensorial

Helps children in the process of organizing their intelligence. All five senses are engaged as children learn to differentiate among sizes, colors, weights, forms, textures, scents, taste, and sounds.

Language

It is designed to build up language skills using three inter-related areas: phonics, visual comprehension, and understanding. We name objects, name cards, read books, sing songs, and talk about everything around us to learn the language.

Math

Helps children learn and understand the concepts of math by manipulating concrete materials. Various activities allow the child to internalize concepts of quantity, sequence, decimal system, place value, and to explore the processes of addition, subtraction, multiplication, and division.

Science

Children learn principles like botany, astronomy, zoology and physical science through the use of manipulatives, puzzles and books.

Geography/Culture

Helps children learn about different people and cultures around the world with respect and admiration, using puzzles, books, booklets and music
